

# Join MN-PSC Today!

Sustainable products minimize waste. Product stewardship helps us get there.

**The MN-Product Stewardship Council** is the go-to, independent organization, for product stewardship information in Minnesota. The Council engages all stakeholders to provide education and a consistent understanding of the concepts, implementation, outcomes, and benefits of product stewardship.

**Product stewardship takes a products entire life cycle** (the design, manufacture, sale, use of, and end of life) into consideration, to ensure that the product minimizes negative impacts to the economy, environment and public health by reducing waste, toxicity, and other problematic outcomes.

**All stakeholders, government, business and non-profit organizations have a role** in determining product stewardship solutions and outcomes. Make sure your voice is heard and join today!

## The benefits of joining the MN-PSC:

- Help shape the future of product stewardship in Minnesota
- Monthly call briefings on the latest product stewardship topics
- In-depth fact sheet analysis of current legislative efforts
- Local government members can serve on Board of Directors
- Business and non-governmental organization members support acknowledged on all media
